- Easy Languages and Currencies
- Easy Intranet IResagent IRescounter
- Easy Extranet – Webapplikations
- Easy Jump and many other features

# *The Company IRes*

- The Company Technology
- This technology will open up new business vistas for you.
- IRes has benefited from the years of industry experience of Mr. Guenther Insam, company founder and CEO.
- After decades of running a successful travel business, Mr. Insam founded IRes (Internet Reservation Systems) and guided a team of technology and travel specialists through the development of the EasyRes Internet Booking Engine.
- The fruit of their efforts is an extremely powerful and flexible tool for booking airline reservations online, that is as suited to global travel distribution as it is to company-wide intranet systems.

# *The Philosophy*

- As a technology partner to travel providers, we support you in all areas related to e-commerce and online marketing. We offer innovative technology and proven concepts.
- By building on your established business reputation and effectively deploying new technologies for product distribution and communications, your agency can carve out a profitable share of the steadily growing internet commerce.
- Our task is to create a seamless connection between the personalized service you provide to your customers and the constantly evolving expectations of the consumer in the online marketplace. Break new ground today!

# *Main features of the core booking engine*

- EasyRes Internet Booking Engine ( IBE )
- IBE Multilingual Multicurrency
- Consolidators with interesting IRes special sales conditions
- Templates for CI
- Text Module individual and language
- Midoffice System
- Newsletter per Customer CRM
- Administration System IRes-Pool – Agency
- Webinterface Admin
- IKS Calculation Program ( Iata -0 Commison )

# *Main features of the core booking engine*

- Statistics
- A backup database records all bookings made
- Web interfaces for a very comfortable Calculation, Lookout and Feel,
- Web interface for Text/ Button/ Email fields modification
- Jump System ( Deep Link Creator )
- Hot Offer System
- Versions and features : EasyRes
  - Extranet Homepages in look and feel of the Customer ( CI )
  - IResAgent reservations platform for Consolidators fixed calculation
- Booking goes directly to the Consolidator
- IRES Counter Counter version, own Calculation, mixing consolidators and
  - IATA / Soon Charter / No-frills – Best Price analyse
- IResmail Mail newsletter inclusive IBE of selected airlines and prices
- IRes Banner IBE Banner including short query IBE
- IRes Prompter IBE for Callcenter
- IRes Query Boxes

# *Main features of the core booking engine*

- The Modular architecture of the flight booking system follows the same basic principles as our hardware setup.
- As easily as we can increase the capacity of our hardware global components the modular structure of our application allows us to easily add any necessary features or modules without having to redesign a new system.
- The flight engine merges and books “Consolidator Net Fares”, negotiated and published IATA fares inventory online in a seamless process.
- IRes has achieved what the market has long been seeking.

# *Dynamic relational modules*

- Inventory and Database Administration
- Cost and price definition and management
- Currency Administration
- Multiple Language Administration
- Geographic Database
- Translation Module
- Geographic Definition Management
- Commission Parameters Management
- Dynamic Tax Parameters Administration
- General System Parameters control
- Multiple branch and Offices Management
- Affiliate and Profile Management
- User access administration and security parameter settings
- Dynamic Terminal addresses administration and scans optimization

- *Availability Caching System*

- All responses are saved into a cache for subsequent access and given a “life time” defined by diverse criteria such as amount of seats or season.
- The caching system significantly reduces the number of scans generated on the GDS or proprietary host systems and minimizes associated transaction costs by eliminating unnecessary availability requests.

# *Office ID/TA Terminal Address Management*

- IRes.Net connects directly to Sabre by passing any third party connectivity.
- The simultaneous sequential communication with the GDS is channelled via multi-threading TA access.
- IRes.Net designed its own TA and office ID management and can simultaneously address thousands of Terminal addresses in different physical locations through different GDS. Access and interaction parameters are based on the travel company's own defined parameters with the GDS.
- The system automatically assigns the Task or office ID according to a given customer location fully respecting the point of sale and global indicators. Fare requests and availability queries are always generated from the point of sale of the customer.
- Security All transactions and personal informations are highly secured via industry standard SSL (Secure socket layer) protocol that provides full data encryption, server authentication and message integrity.

# *Security*

- All transactions and personal informations are highly secured via industry standard SSL (Secure socket layer) protocol that provides full data encryption, server authentication and message integrity.

# *Product Line*

- The IRes.Net product line comprises different applications based on a common, flexible and interactive architectural platform that provides highly efficient internet reservation capacity allowing wholesalers and suppliers to successfully distribute their inventory through the internet.
- IRes.Net offers specifically engineered and custom-tailored solutions for travel content distributors for B2C, B2B or intranet designed to accurately sell travel content over the internet.

# *EasyRes*

## *Front end B2C engine for direct retail*

- IRes.Net EasyRes is a powerful full-featured, fully customized Internet booking engine (IBE) that enables consumers to directly book their flights arrangements via the Internet with only a few clicks.
- IRes.Net EasyRes also empowers travel agencies or travel portals to actively sell consolidator Net fares, negotiated and published IATA fares inventory online with their own mark-up or earn corresponding provisions.
- EasyRes can also be used for retail directly by inventory suppliers. Consolidators can use EasyRes to directly sell their inventory to consumers from their own web site and therefore extend their distribution channels.

## ■ The EasyRes based on Sabre

Power-shopper functionality for automatic search.

This tool activates itself automatically whenever the requested flight is not available. The customer can define a flexible date range for its departure or return date and the Power-shopper will then automatically search for availabilities with all airlines. Every Individual city pair availability launches automated parallel mechanism.

- Accessing consolidator's net fares databases and validating every single applicable routing regulation governing every single fare within seconds.
  - Query GDS for IATA fares and contracted negotiated fares.
  - Merging of all fares - Simultaneous querying and evaluation of availabilities through GDS for all different fares.
  
- All availability queries to airlines are sent simultaneously allowing a response time for all airlines equivalent to one single query.
  - listing of all available fares in one screen- This total process occurs within seconds allowing consumers to easily complete their booking process within 3 clicks and a few minutes.
  - The last click will send the final passenger data to the GDS and generate a record locator confirming an error free reservation.
  
- Entering of passenger data
- Generation of record locator
- Queuing to adequate PCC or office ID

# *EasyRes*

- The booking engine is fully multilingual and multicurrency
- Layout customization enables web designer, without their extensive knowledge or manipulation of the underlying business logic. HTML, DHTML, WML located in JSP files support customization of the site, including multiple languages and multiple views.
- Background design Logo integration
- Text merge
- Style sheet (CSS) integration  
choice of several Buttons or design and integration of own buttons
- Language module:  
many languages are now available and more can easily be added: all languages are editable to individual wording and phraseology

# *Languages*

- All Languages individual possible to edit through our Text - Language – Module
- Each Customer can create online via Web interface his own IBE look and feel and text and buttons

# *Agency administration parameters and business reporting*

- IRes.Net EasyRes provides retailers with all necessary tools to measure site efficiency and productivity. It records and logs all activities generated through their booking engine, providing detailed valuable informations about all created bookings:
- Real time booking summaries and statistics
- Creation date statistics
- Destinations and departure airports statistics
- Commission and price Calculation adjustments
- Real time and prospective sales reports
- Credit card acceptance and validation possibility
- Determination of the travel cancellation insurance amount
- Full overview of all generated Flight bookings (listing per month)
- Booking details with complete history of booking process
- Form of payment definition
- E-mail and fax confirmation
- Record locator revisit through GDS
- Creation and storage of passenger itinerary

# *B2B / Inventory suppliers (consolidators / Portals)*

- EasyRes fully integrates consolidator net fares with published IATA and contracted negotiated fares loaded in the GDSs and considerably enhances their own inventory and retail power through the internet.
- EasyRes is a cost-effective, customized travel system solutions for consolidators and portals and helps increasing segment production with the minimum of scans.
- Agencies usually do not have their own net fares database and can not afford to have their own IBE.
- The consolidator IBE gives agencies the possibility to resell on line with their own markup. EasyRes empowers agencies to fully use the sell potential offered by the internet.
- Consolidator can multiply their internet retail structure, expand their customer and maximize their revenue. Consolidator can distribute their inventory through the travel agency network and develop strong commercial relation with travel agencies as well as e-commerce sites and travel portals.

# *Additional Features*

- Unlimited storefronts multiplication possibility
- Segments ownership to the consolidator (or agency if requested)
- Customer binding
- Extend retail net
- Individual markup for agencies and affiliates accounts
- Full individual customization of their sites
- Individual editing of wording and language
- Own administration tool and statistics
- Individual fare viewership definition
- Individual agency log-in and recognition
- Individual agency scan vs bookings reporting

# *IRes.Net IATA*<sup>TM</sup>

- IRes.Net Direct basically offers most of the features of the EasyRes engine with consolidated net fares.
- It is the ideal tool that enables an agency to instantly be able to sell official IATA published fares via the internet.
- Negotiated fares loaded in the GDS for a specific PCC or office ID can also be booked through IRes.Net Air Direct.
- The tool is also multilingual and multicurrency and can be fully customized to the look and feel of the agency.
- Worldwide available flight engine for local IATA fares only including Nego and SNAP fares if loaded on the PCC or office ID. (Global indicator and point of sale compatibility)
- All availabilities and fare quote queries and pricing process are GDS-based. Bookings can be channeled automatically to a predefined PCC or office id. One of the main advantage of IRes.Net Air Direct is its extremely short implementation time frame.
- IRes.Net Air Direct can be implemented within a day enabling immediate e-commerce presence.
- Since the IRes.Net technology is modular, net fares can easily be integrated at a later point in the IRes.Net Direct module.

# EasyRes Express

# *IRes Agent*

## ***Consolidator Platform single and multiple Consolidators***

- The IRes.Net Agent provides agencies with the web-based application they need to ensure maximum value for their distribution budget. Inventory suppliers as well as travel agencies are pressured by the market to optimize agent productivity and maximize profitability.
- Agents need a system that can simultaneously search and analyze vast array of fares inventory and their availability for a given request.
- IRes.Net Agent not only displays a comprehensive list of rule-verified applicable fares but effectively retrieve their availability within seconds, allowing agents to streamline, improve work flow and increase productivity. Agents that access the consolidator intranet are able to see and book their contracted fares through the consolidator database.
- IRes.Net Agent handles complex restrictions that can govern a single net or commission- based fare without errors and is customized to the travel agency business agreement with its consolidator. The system actually is able to validate over 350 fields of rule sets. The inventory supplier can define selective viewership of fares and individual net price markup per agency.

# *Agencies Intranet for consolidator*

- Control costs and maximize revenue!
- We know that in today's competitive travel market, it is vital to manage costs and maximize the value you receive from suppliers.

# Features

- Single Airline selection possible
- Live display of GDS-availability for direct comparison
- Net price display can be enabled or disabled Net and retail price shown parallel if desired
- Automatic agency recognition
- Power-shopper functionality per airline or all airlines
- Enhanced Parallel availability retrieval
- Automised PNR placement on pre-defined PCC or office ID
- Enhanced statistics for inventory suppliers
- Scan and booking ratio per agency or branch
- Destinations statistics per carrier and global
- Statistics booking date vs departure date
- Optimized Scan reduction and management through permanent caching mechanisms

# IResAgent Example

The screenshot shows a Microsoft Internet Explorer browser window displaying the IResAgent website. The browser title is "IRes-Agent Ihr Online Partner - Microsoft Internet Explorer - Everyday.com". The address bar shows "http://www.iresagent.de/index.html". The website header features the "IRes.net" logo and the text "INTERNET RESERVATION SYSTEMS".

The main search area is titled "ERWEITERTE SUCHE" and includes the following fields and options:

- von:** [Empty]
- nach:** [Empty]
- Datum hin:** 22 AUG
- Datum zurück:** 05 SEP
- Airlines:** [Empty]
- Klasse / Reisende (Erw, Kinder, Kleinkinder):** Economy / 1 Erw 0 Kind 0 Kleinkind
- Tarif:** Sonder
- Modus:** Preis
- Consolidator:** AERTICKET AG (dropdown menu is open)

The dropdown menu for "Consolidator" lists the following options:

- AERTICKET AG
- AerTicket Nuernberg
- Condor Schweiz
- DER Tour
- FTI.at
- Mc Flight
- Sparflug
- TLR Tiroler Landes Reisebüro

Below the dropdown menu, the search criteria are displayed:

- Ab:** Deutschland
- Nach:** Vereinigte Staaten von Amerika
- Vom:** 22 August
- bis zum:** 05 September
- Fluggesellschaft:** Beliebige Fluggesellschaft oder...
- Reisende:** 1 Erwachsene 0 Kinder 0 Kleinkinder
- Klasse:** Economy
- Tarif:** Sonder
- Modus:** Preis
- Consolidator:** AERTICKET AG

A "Flugsuche starten" button is visible at the bottom right of the search area. The Windows taskbar at the bottom shows the Start button, several open applications (Internet Explorer, Microsoft Word, Microsoft Office), and the system tray with the date "08.08.2004" and time "09:22 Sonntag".

# *Advantages*

- Increase productivity and reduce costs of Inventory
- Supplier-controlled segment ownership with Full PNR access
- Increase GDS-segment compensation
- Enlarge distribution platform
- Ability to define fare viewership
- Ability to define price level individually for every single agency
- Monitor look to book ratio of agency Travel Agency
- Sequential availability search that enables agents to process queries within seconds and to close more sales in less time with less efforts and no mistakes
- Increase agent productivity
- Increase agent close ratio Handle more calls and customers Rule-verified reservation
- Eliminate debit memos
- Easy-to-use intuitive graphical interface requiring no training
- Reduce call time and communication costs
- Increase sales and commissions

**Additional remarks: Please make sure to email or fax us your reservationnumber and creditcard info to make sure we recieved it at internet@abctravel.de or +49 621 / 72 92 555.**

**FareBase:** ABCMil/4018/3/38/NW/V/Y/VSPWU20/VSPWU20/FaID=33L

**Validity:** This fare is only valid for departures between the 08/27/2004 and the 10/31/2004 !!

**Minstay/MaxStay:** SU-30: Sunday rule (the trip time must include at least one Sunday) - The travel duration may not to exceed 30 days.

**Farebasis:** With each passenger a maximum of 2 Children and a maximum of 1 Infant may travel. Passengers between the ages of 2 and 11 are considered to be children. Passengers up to 23 month are considered to be infants.

**Outbound days:** Sunday 0 USD / Monday 0 USD / Tuesday 0 USD / Wednesday 0 USD / Thursday 0 USD / Friday 0 USD / Saturday 0 USD

**Inbound days:** Sunday 0 USD / Monday 0 USD / Tuesday 0 USD / Wednesday 0 USD / Thursday 0 USD / Friday 0 USD / Saturday 0 USD

**Discounts (Children / Infants):** Children erhalten 33% Ermäßigung auf den Erwachsenenpreis (Bulk fare). Infants erhalten 90% Ermäßigung auf den Erwachsenenpreis (Bulkfare). The indicated discounts only apply if no other child or infant fares exist in the database.

**Minimum Selling:**

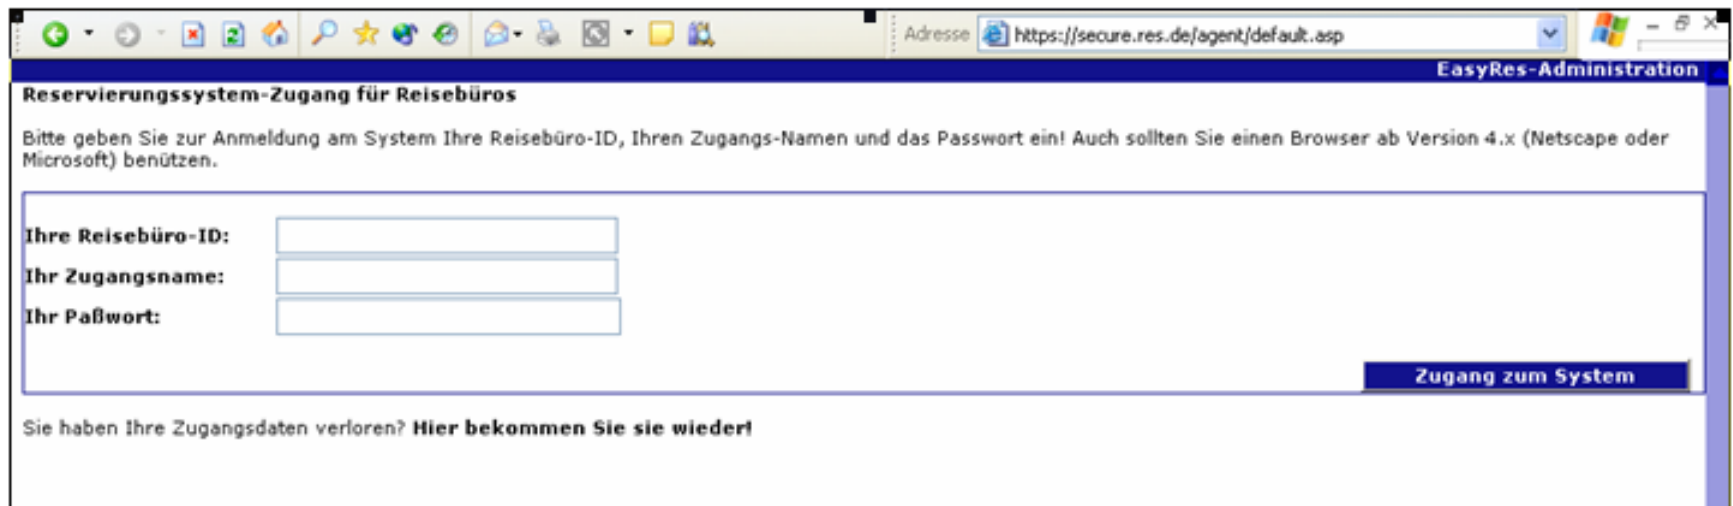

# EasyRes bookings are going into Outlook

The screenshot shows the Microsoft Outlook interface. The left sidebar displays the 'E-Mail' folder structure, including 'Posteingang in Ginsam (512)', 'Posteingang (208)', 'Ungeliesene Nachrichten (208)', 'Zur Nachverfolgung [1]', 'Gesendete Objekte', 'Posteingang in IRES Buchungen (8414)', 'Posteingang in IRES.net (4523)', 'Gelöschte Objekte', and 'Entwürfe [22]'. The main pane shows a list of emails from 'IRES Automator' with columns for 'Von', 'Betreff', 'Erhalten', and 'Größe'. The bottom taskbar shows the Start button and several open applications, including Microsoft Word and Internet Explorer. The system tray indicates the time is 09:46 on Sonntag, 08.08.2004.

# Administration EasyRes

- Administration Webinterface (german)
- [www.ires.net](http://www.ires.net)
- <https://secure.res.de/agent>
- Entrance:

The screenshot shows a web browser window with the address bar containing `https://secure.res.de/agent/default.asp`. The page title is "EasyRes-Administration". The main heading is "Reservierungssystem-Zugang für Reisebüros". Below the heading, there is a message: "Bitte geben Sie zur Anmeldung am System Ihre Reisebüro-ID, Ihren Zugangs-Namen und das Passwort ein! Auch sollten Sie einen Browser ab Version 4.x (Netscape oder Microsoft) benutzen." There are three input fields: "Ihre Reisebüro-ID:", "Ihr Zugangsname:", and "Ihr Paßwort:". A blue button labeled "Zugang zum System" is located at the bottom right of the form area. Below the form, there is a link: "Sie haben Ihre Zugangsdaten verloren? **Hier bekommen Sie sie wieder!**".

Рейсы Пожалуйста, выберите ...

Путешествующие	Запрос рейса	Выбор тарифа	Наличие свободных мест	Расписание рейсов	Резервирование	Подтверждение
----------------	--------------	--------------	------------------------	-------------------	----------------	---------------

Язык: Select Language...

Валюта: United States Dollars, United States (USD)

**Сколько человек путешествует?**

Теперь Вы можете составить свой персональный маршрут. Для запроса свободных мест и точных расценок, укажите, пожалуйста, в каждой возрастной ячейке число путешествующих.

Взрослые 1 Дети (2 -11 лет): 0 Маленькие дети (до 2 лет): 0

**Кто путешествует?**

Большинство авиакомпаний предлагает скидки для определенных категорий путешествующих, например, молодежь, студенты или пенсионеры. Если Вы или один из членов Вашей группы принадлежит к одной из этих категорий, Вы выберите соответствующий вариант плюс к "нормальному тарифу". Пожалуйста, обратите внимание, что в настоящий момент в одной брони нет возможности резервировать и нормальный тариф и тариф со скидкой (например, 2 взрослых и 1 молодежный). Можно выбрать только один тариф в одной брони для всех путешествующих.

- Нормальный тариф (лица старше 12 лет)
- Молодежь (с 12 до ок. 24/25 лет)
- Студенты (с 12 до ок. 27 лет, требуется студенческий билет)
- Пенсионеры (от ок. 60 до 65 лет)
- Этнический (Как правило, требуется гражданство страны прибытия)

## EASY RES: CONFIGURATION "EasyRes Express"

The sourcecode for **EasyRes Express** is a code that works as an interface to EasyRes. This code allows a flightquery (API-Mode 1), whereby the visitor of your homepage can enter the required settings very quickly.

Using this express-query you dont have to do the time-consuming configuration of the different EasyRes query-options, but with the ease of one click in the express-window, you are shown the pricelistings of the EasyRes system.

If you have questions or problems concerning this system, please click on the help index card (  ) at the right corner of the index cards. You will find an easily understandable online-help here.

**You can also call our EASY RES Hotline (not the IRES Pool Hotline!) by this number 089-54916570, or send an email to an [EASY RES employee](#) if you are stuck.**

You can download the complete [description of our API](#) for programmers here.

## Configuration of your personal sourcecode for "EasyRes Express" (for programmers only!)

Please fill out every field of this form and then click the "Send Data" button. You will then receive the sourcecode for the insertion into your website. Please note that your provider must support the chosen script-language, because if not the code wont be executable!

Where should we send the sourcecode to?

(leave blank for testing!)

Your IRes ID

Your IRes hostname

Which departure list shall be displayed?

Desired default for the airport of departure
